

## VIRTUAL CHIEF INFORMATION SECURITY OFFICER

Enterprises have adopted a logical approach, both strategic and financially, to outsource their cybersecurity functions. At CyberArq, the Virtual CISO (vCISO) designed to make top-tier security professionals available to your organization for security expertise and guidance. Our team of experts have decades of real cyber world experience that will work WITH your organizational objectives and show measurable improvements in your current organization's security posture.

### vCISO APPROACH

The role of a CISO is crucial to the success of a business, we recognize the high costs that are associated with a direct hire of a CISO. Consequently, CyberArq has developed a service that allows enterprises to employ a virtual CISO. A vCISO carries out the same role as a traditionally appointed CISO, however at a much lower cost. The benefits of this make it a worthwhile consideration for all organizations that value cyber-security. Not only does a vCISO reduce costs but they allow flexible working times and days to suit your organizational needs. A CyberArq vCISO brings results and ensures that all operations are running smoothly without placing pressure on company finances. It is the ideal way to improve your enterprises cyber-security infrastructure and reduce vulnerable attack surface area.

### WHY CYBERARQ vCISO SERVICES?

CyberArq's mission is to fix the broken information security industry, we've made it our objective to work with clients to develop their current programs with our experienced professionals who work firmly and truly care about the protection of people's information.

### vCISO SERVICES

#### MENTORING & SUPPORT

Our vCISO mentoring program, designed to work with your current designated ISO by reducing the gaps through mentoring and overseeing the organizations security posture.

#### COMPLETE OUTSOURCING
